

## **FACT SHEET**

You must fill out an application form and meet all the criteria and provisions that are contained therein. To download a form, click on APPLICATION FORM on [www.mwwater.com](http://www.mwwater.com)

### **REBATE CRITERIA:**

#### **High-efficiency Toilets (\$150 rebate for commercial (maximum \$1,050); \$100 rebate for residential (limit 2 per residence))**

- Rebates are for replacement of toilets manufactured before 1994 that use 3.5 gallons / flush or more. Only EPA WaterSense-labeled toilets that use 1.28 gallons per flush or less listed at [www.epa.gov/WaterSense/product\\_search.html](http://www.epa.gov/WaterSense/product_search.html) are eligible for rebate. The WaterSense logo must appear on the toilet or box.
- Limit 2 toilet rebates per residence.
- Low-flow toilets (1.6 gallons per flush) do not qualify for rebate.

#### **High Efficiency Clothes Washers (\$100 rebate, limit 1 per residence)**

- Replace your 2000 or older model clothes washer with a high efficiency model. Only Tier 3 models listed by the Consortium for Energy Efficiency (CEE) at [www.waterenergysavings.com](http://www.waterenergysavings.com) are eligible.
- Limit 1 clothes washer rebate per residence.

#### **High Efficiency Dishwashers (\$75 rebate, limit 1 per residence)**

- Replace your 2002 or older model dishwasher with a high efficiency model. Only models listed at [www.energystar.gov](http://www.energystar.gov) are eligible and electricity and water usage must not exceed the following maximum level: 307 kWh/year and 5.0 gallons/cycle (residential) – provide copy of tag.
- Limit 1 dish washer rebate per residence.

#### **Irrigation Rebates**

For assistance call 970.879.2424.

### **RESIDENTIAL**

#### **Rain and/or Soil Moisture Sensors**

- A rain sensor can be added to an irrigation system to interrupt watering schedules when it detects rainfall.
- Soil moisture sensors connect to controllers and are able to adjust water schedules based off measured water content in the soil.
- One rebate per property.
- \$75 each

#### **High Efficiency Heads and Nozzles**

- Efficient sprinkler heads and nozzles can deliver water more uniformly and reduces water waste compared to traditional nozzles. Internal check valves prevent low head drainage between irrigation cycles.
- One-time rebate per property.

- \$3 per nozzle, maximum of 25 nozzles or \$75
- Entire irrigation zone must have the same nozzle style.
- Must be pressure-regulated 6” or 12” with internal check valve.
- Eligible Models:
  - Hunter - Prospray PRS30 spray body (30psi model for fixed spray nozzles.)
  - Rain Bird- 1800 SAM-PRS or RD 1800 spray body (30psi model for fixed spray nozzles)
  - Hunter - PGP Ultra or I20 PRB rotors (45psi model for Hunter MPR 25, 30, 35 nozzle series).
  - Rain Bird- 5000+PRS45 rotor (45psi model for Rain Bird MPR 25, 30, 35 nozzle series).

### **Drip Irrigation Conversion Equipment**

- Equipment for transforming an existing irrigation system, typically using traditional heads, into a drip irrigation system. This allows water to be delivered directly to the roots of plants, minimizing evaporation and water waste and promoting healthier growth.
- \$75 per zone, limit two zones per property.
- Rebate is for spray to drip conversion. Eligible equipment includes drip control zone kit, dripline, drip hose, conversion heads, point-source emitters, bubblers, micro-sprays

### **Irrigation Efficiency Evaluation**

- An evaluation can be an assessment or an audit of the existing irrigation system to determine recommended actions. An assessment is an analysis of the installation, operation, and efficiency of an irrigation system. An audit includes an assessment plus catch-cup testing, which provides distribution uniformity and precipitation rate values used to create seasonal irrigation schedules and make sprinkler or nozzle adjustments.
- \$100 per property.
- Must be completed by a certified [WaterSense Pro](#).
- Must result in a report that meets requirements listed in the [Irrigation Efficiency Evaluation Report](#). Must submit assessment/audit report and proof of payment.

## **MULTI-FAMILY RESIDENTIAL AND COMMERCIAL IRRIGATION EFFICIENCY REBATES**

### **Irrigation Efficiency Evaluation**

- An evaluation can be an assessment or an audit of the existing irrigation system to determine recommended actions. An assessment is an analysis of the installation, operations, and efficiency of an irrigation system. An audit includes an assessment plus catch-cup testing, which provides distribution uniformity and precipitation rate values used to create seasonal irrigation schedules and make sprinkler or nozzle adjustments.
- \$250 per property
- Must be completed by a certified [WaterSense Pro](#).
- Must result in a report that meets requirements listed in the [Irrigation Efficiency Evaluation Report](#). Must submit assessment/audit report and proof of payment.

### **Irrigation Equipment**

- See descriptions in residential rebates table: Smart Irrigation Controller, Rain and/or Soil Moisture Sensors, High Efficiency Heads and Nozzles, Drip Irrigation Conversion Equipment.
- 25% of cost up to \$1,250 for eligible equipment.

- Must be a recommended upgrade on required irrigation assessment report. Must meet requirements for equipment listed in the residential rebates section.

For more information and rebate program policies please visit:

<https://www.steamboatsprings.net/1515/Outdoor-Water-Efficiency-Rebates>

### **Xeriscape**

- Rebate is for replacement of existing irrigated turf with indigenous drought tolerant plant or non-irrigated xeriscape “garden” using the seven xeriscape principals. (see plant list: <https://www.mwwater.com/wp-content/uploads/DroughtTolerantPlantList2009.pdf>). A landscape plan must be approved and followed.
- Amount of rebate will be up to \$75 on a square footage basis (e.g., 100 sq.ft. = \$34.)
